

WETLAND PROFESSIONAL

Wetland Project Manager is needed for full time permanent position at environmental consulting firm in Norfolk, Virginia.

The successful candidate will have at least three years' experience in delineations and/or preparing permit applications. The wetland professional will work with a team of other wetland and environmental professionals to develop and expand our superb existing wetland client relationships in southeast Virginia. We seek a multi-talented professional for continued growth of our business and advancement of our reputation for environmental solutions.

This is a project management opportunity with significant potential for increasing responsibility, for a professional looking to further his or her career in the field of environmental consulting. If you have ambition, vision, experience, and interest in the outdoors, please apply. The job provides the opportunity to:

Perform field and in-office services both independently and on a team, for wetland delineations, permits, and mitigation

Manage projects and contribute significantly to key decisions for clients

Grow professionally by ongoing training, great work experience, and increasing responsibility and

Work with a team of talented environmental professionals performing consulting services.

POSITION OVERVIEW

This position includes performing wetland delineations at tidal and nontidal wetland sites, delineating stream boundaries, delineating resource protection areas, advising clients as to reducing impacts, preparing permit applications, and wetland mitigation. In addition to wetland services, you will have opportunities to expand your skills and participate in additional consulting services areas within the company's range of services.

The project manager's tasks and responsibilities include: preparing proposals performing field investigations and wetland delineations in accordance with the US Army Corps of Engineers Wetland Delineation Manual, and Regional Supplements preparing joint permit applications and mitigation plans manage consulting projects to scope, schedule, and budget working cooperatively with a high-performance team of environmental professionals serving as a leader and mentor when opportunities arise identifying new service areas, and developing these service areas.

QUALIFICATIONS

BS/MS in environmental science, ecology, geology, biology, chemistry, natural resources, environmental engineering, or related degree.

3+ years progressive experience in an environmental consulting environment, including responsibility for all aspects of managing and supervising projects.

Ability to work both independently and cooperatively within a firm composed of intelligent and motivated environmental professionals.

Specialized knowledge and expertise in wetland science, regulation, and permitting. This includes knowledge of the dominant plants, soil types, and hydrology indicators typically found in southeast Virginia, as well as knowledge and experience with wetland regulatory programs of the US Army Corps of Engineers and Virginia Department of Environmental Quality.

Desire and interest in working independently within natural environments, including forests, streams, wetlands, and the outdoors.

A sense of direction and ability to locate one's position on the landscape using map, compass, and field tools.

Excellent writing abilities.

Experience with GPS, MS Word, and other necessary software.

Additional knowledge and experience in one or more of the firm's other consulting service areas is a plus for any candidate. Please see the additional service areas which are listed in our website.

To apply, please submit your resume via email or mail.
